

WHITEN UP

Think Don Johnson, Grace Jones and model Josie Maran were born with their killer smiles? Think again. Their seemingly perfect pearly whites are the result of time spent in **Dr. Debra Glassman's** chair (complete with heated massage pad and TV views). Manhattan's top cosmetic dentist (and one of the few females in the field) along with her husband/partner **Dr. Steven Glassman**, regularly "fix" the smiles of people in the public eye (and aren't we all?). CBS anchorwoman Cindy Hsu, the Ganzi family (as in Victor, founder of Hearst Corp.) and Gloria Gaynor are on their client list, as are many folks who fly in regularly for everything from one-hour laser whitening to full-mouth restorations. In addition to the docs' quality work and their charming and calming

personalities, you'll love the little touches in the office (warm hand mitts, soothing music and spa aromatherapy candles). Trust us, we speak from experience.
